Advanced Tab

7. Under the Advanced tab and the user is advised to **"enable tracing"**, **"enable logging"** and **"show console"** as shown below.

8. To complete the Java Control Panel configuration, Select Apply and close the java control panel.

Update the java.security file

Lastly the java.security file has to be updated.

Check your Java version. In this example the java version is 1.8.0_211.

If you have updated to the latest as of 20180830 this would be 1.8.0_211.

<u>STEPS</u>

- 1. Run Notepad as Administrator
- Click open file and search for the "java.security". Look for the java.security find. It should look like the below

C:\Program Files\Java\jre1.8.0_211\lib\security

3. Once the file is opened Look for the below:

jdk.tls.disabledAlgorithms=SSLv3, RC4, MD5withRSA, DH keySize < 1024

or use

RC4, DES

4. Change the 1024 to 768. It should now look like this

jdk.tls.disabledAlgorithms=SSLv3, RC4, MD5withRSA, DH keySize < 768

- 5. Save the document.
- 6. Launch ASYCUDA WORLD GUYANA.
